Delaware Environmental Information Fuel Resource Mix

The following environmental information is for Delmarva Power customers who have remained with Delmarva Power and who have not chosen a competitive electricity supplier. Electricity can be generated from a number of different fuels. This information, also known as “Fuel Resource Mix,” will allow you to compare the electricity supply provided by Delmarva Power to electricity supply from other Electric Suppliers. Delmarva Power will provide this information to its customers each quarter. Information on the Fuel Resource Mix of other Electric Suppliers will be available on the Delaware Electric Supply Choice web site at www.state.de.us/delpsc/electric.shtml or by calling toll-free 1-877-SHOP-DEL (1-877-746-7335).

The electricity supply provided to customers by Delmarva Power from January 1, 2006, to December 31, 2006, was produced using the following fuels:

(continued on the reverse side)

**Energy Source (Fuel Resource Mix)
January 1, 2006 - December 31, 2006**

Coal	57.5%
Gas	5.1%
Nuclear	35.0%
Oil	0.3%
Unspecified Fossil	0.0%
Renewable Energy	
Captured Methane Gas	0.2%
Geothermal	0.0%
Hydroelectric	1.1%
Solar	0.0%
Solid Waste	0.6%
Wind	0.1%
Wood or other Biomass	0.1%
Unspecified Renewable	0.0%
Total	100%
Renewable energy sources subtotal:	2.1%
