

Traditional Lighting

Mongoose

The Mongoose provides optimal lighting control in a sleek, compact design. It is ideal for applications where poles cannot be in the roadway “Clear Zone” or if pole setback from the roadway is greater than 12 feet.

Applications Streets, highways, parking lots, open areas, commercial driveways, industrial sites

Lamp Source High pressure sodium (HPS)

Wattages HPS: 150, 250, 400

Pole Styles Round wood, mounting height 30 or 35 feet (embedded); fiberglass, mounting height 25 or 30 feet (embedded)

Lighting Distribution Tilt angles from 3 to 20 degrees, depending on pole setback and roadway width
