

IMPORTANT RATE INFORMATION FOR RESIDENTIAL ELECTRIC CUSTOMERS

The Delaware Public Service Commission made a final determination in Delmarva Power's electric delivery rate review to adjust rates to recover investments for the electric delivery system over the last two years. These investments include modernizing and enhancing the system to maintain safe and reliable service for customers, while meeting the area's growing demand for electricity.

Delmarva Power initially filed its rate review on March 6, 2020, and implemented an interim increase on Oct. 6, 2020. The Commission has approved final rates that are lower than the interim increase. Therefore, customers will see a decrease on their bill as a result of this new rate adjustment.

How will this rate change affect me?

- Effective Sept. 17, 2021, a typical residential customer, using an average of 845 kilowatt hours (kWh) of electricity per month, will see a total monthly bill decrease of approximately \$1.64 or 1.4% percent.
- Customers will be refunded the difference between interim rates and final rates billed between October 2020 and the current billing period. This will appear as a "One-time Rate Refund" in the Electric Summary section on your bill.

What can I do to help manage my energy costs?

- Sign up for Budget Billing to avoid seasonal peaks by dividing your payments evenly over the entire year.
- Save money and energy with tools on My Account. Sign up today at delmarva.com/MyAccount.
- Visit delmarva.com/WaysToSave for tips and programs that can help you save energy and money.

Please review the chart on reverse for new rates. Effects of these changes will vary with your usage.
