ELIGIBILITY AND REQUIREMENTS

The Plug in Vehicle (PIV) Charging rate applies to residential Delmarva Power customers in the State of Delaware and is available to customers receiving separately metered electric service used solely for PIV battery charging purposes. Customers in multi-dwelling units are not eligible for this program.

By signing below:

- I acknowledge that the terms and conditions of the Delmarva Power Electric Tariff, including for the “PIV” service classification found at Leaf Nos. 59 and 59a, will apply to this service until such time as cancellation is requested.
- I acknowledge that this is a month-to-month service.
- I acknowledge that my meter under this PIV rate must receive Delmarva Power Standard Offer Service.
- I represent that I have or plan to have an electric vehicle that will be using PIV battery charging.
- I further understand and agree to the following:
 - A second electric meter will be required to receive PIV service;
 - Prior to installation of the second meter, Delmarva Power employee(s) or representative(s) will conduct an assessment of my premises, at Delmarva Power’s expense;
 - I am responsible for hiring an electrician for wire-up and inspection prior to installation of the second meter;
 - I am solely responsible for any and all costs associated with the purchase and the installation by Delmarva Power of the second meter, which I must pay in full before the second meter installation will be scheduled by Delmarva Power; and
 - Delmarva Power will retain ownership and operation of the second meter.
- I agree to allow Delmarva Power to maintain necessary equipment (if applicable) to monitor and/or manage the PIV load.

Please check the following if it applies:

I am requesting to be enrolled with the optional Rider PIV-Green (Tariff Leaf No. 129), which provides 100% renewable energy and will be applied to billed kilowatt hours. I understand this will result in an additional charge on my Delmarva Power bill.
