Year:	Make:	Model:	Odometer:

- I am providing a copy of my residents' plug-in vehicle registrations to verify that the vehicles are registered in Maryland and travel more than 30 miles using electricity as a fuel. (List additional vehicles on a separate sheet if necessary.)
- I do not have a plug-in vehicle registered at my property, but have a resident(s) interested in EV ownership.

PROGRAM SELECTION

Open to qualified multifamily properties (condominiums, apartments with garage parking) and property owners/HOAs. Approved applicants will receive a 50% discount from Delmarva Power for selected, eligible Level 2 EVSE equipment at the point of sale. Customers are required to share their charging information and price structure with Delmarva Power.

Installation Options (select 1)

- Multifamily Property Incentive: If approved, I will coordinate with Delmarva Power to install my property's charging station. I understand that Delmarva Power will pay for the installation costs up to \$7,500 per charging station (limit of 2 charging stations). Any remaining balance will be paid directly to the installer on the day of installation. This selection will require a property assessment prior to approval.
- Multifamily Property Rebate: If approved, I will hire a licensed electrician to install my charging station. I will submit the required materials (itemized invoice, photo of installation with serial number, inspection certificate) to Delmarva Power within 30 days of installation to receive my rebate. Delmarva Power will rebate \$7,500 in installation costs per charging station (limit of 2 charging stations).
