### INSTALLATION INFORMATION

How many properties are you planning to install a Level 2 EV charger on and what is the number of ports you are planning to install?

Properties	Ports
------------	-------

Have you already installed Level 2 EV Chargers?     No     Yes

### ELIGIBILITY AND PROGRAM REQUIREMENTS

- Purchase and install an eligible Level 2 charger from the list of [approved chargers](#) on or after May 1, 2022.
- Submit this rebate application form to begin the process.
- Submit a signed and dated Customer Participation Agreement.
- Be an active Delmarva Power small business or nonprofit electric customer that uses 100 kW or less per month.
- Your company must be based or formed in Maryland.
- Give Delmarva Power access to your charging data, which requires either Wi-Fi or a 4G or 5G network at your property. You must purchase a 5-year cloud plan for your charger(s), which provides Delmarva Power access to your charging data.
- Provide Delmarva Power with the price EV drivers pay to charge their vehicles at your charger(s).
- Within 30 days after successful installation of your chargers, submit the following materials to receive your rebate: dated copy of sales receipts or invoice with EV charger model number(s), dated copy of installation invoice(s), photo(s) of installed chargers' serial number(s), and proof of approved local jurisdiction inspection.
- Eligible customers will receive a 50% rebate on the cost of equipment, warranty, and installation for eligible Level 2 chargers. You can receive up to \$5,000 per Level 2 charging port, limited to \$30,000 per location.
- The program will end January 13, 2024 unless the Maryland Public Service Commission approves a program extension.
